Medicines Bitesize 2024

**8th May, 15th May, 22nd May, 26th June, 3rd July &
10th July**

6 x 2hr online CPD workshops

These are 6 separate but complementary courses. You are encouraged to book on all 6 but this is not essential. *Courses will run from 2pm to 4pm.*

About the speaker – Jude Roberts

Jude qualified from Edinburgh vet school in 2003 and spent ten years in predominantly farm animal practice whilst undertaking her Certificate in Cattle Health and Production and PhD in mastitis detection methods. She then moved to work within the pharmaceutical industry whilst continuing to teach as an Associate Lecturer at Cambridge University. Jude is now a Veterinary Consultant at Map of Ag and provides farmer and veterinary support in all aspects of herd health and preventative medicine.

Synopsis

These workshops will provide case based discussions about medicine usage to include antibiotic classification and justification, withdrawal periods, cascade use and medicine use under red tractor standards, high health status and organic herds.

- **Mastitis** – lactating cow treatment: intramammaries – options, for how long, how often. Use of NSAIDs, use of systemic antibiotics and other alternative approaches
- **Mastitis** – dry cow treatments: dry cow antibiotics, selective dry cow therapy and use of internal teat sealants
- **Fertility** – treatment options available: including hormones – choice and how to use, synchronisation and treatment of fertility disorders
- **BRD** – choosing an antibiotic, justification of a category C product, when does second line become first line, metaphylaxis
- **Scouring animal** – calves and cows what can be given, when may antibiotics be appropriate, use of NSAIDs
- **The sick cow** – treatment regime without a diagnosis, on label versus cascade, “miscellaneous” products that may be in the dispensary

Each workshop will have a short presentation about the medicine requirements in each subject area, the red tractor standards and the available products with any relevant detail. There will then be an opportunity for questions and discussion before the real case example to facilitate discussions within the group about options for treatment.

Registration Form

Medicines (2024) - Courses are limited to 20 delegates
