

AM.a.1 - Justification for the use of Highest Priority Critically Important Antibiotics

It is a requirement of the Red Tractor Dairy and Beef and Lamb standards that Highest Priority Critically Important Antibiotics are used as a last resort under veterinary direction, backed up by either sensitivity or diagnostic testing. This template is designed to help demonstrate that the use of an HP-CIA (3rd & 4th generation cephalosporins, fluoroquinolones, Colistin) has been as a last resort but another similar template/document can be used. Please attach relevant laboratory reports to this template.

Identification of animal/animals treated	
Diagnosed condition	
Which, if any, diagnostic tests have been used?	
Product prescribed	
Has culture and sensitivity testing been carried out in decision to use HP-CIA?*	
C&S test result	
Comments	

*attach relevant laboratory reports
